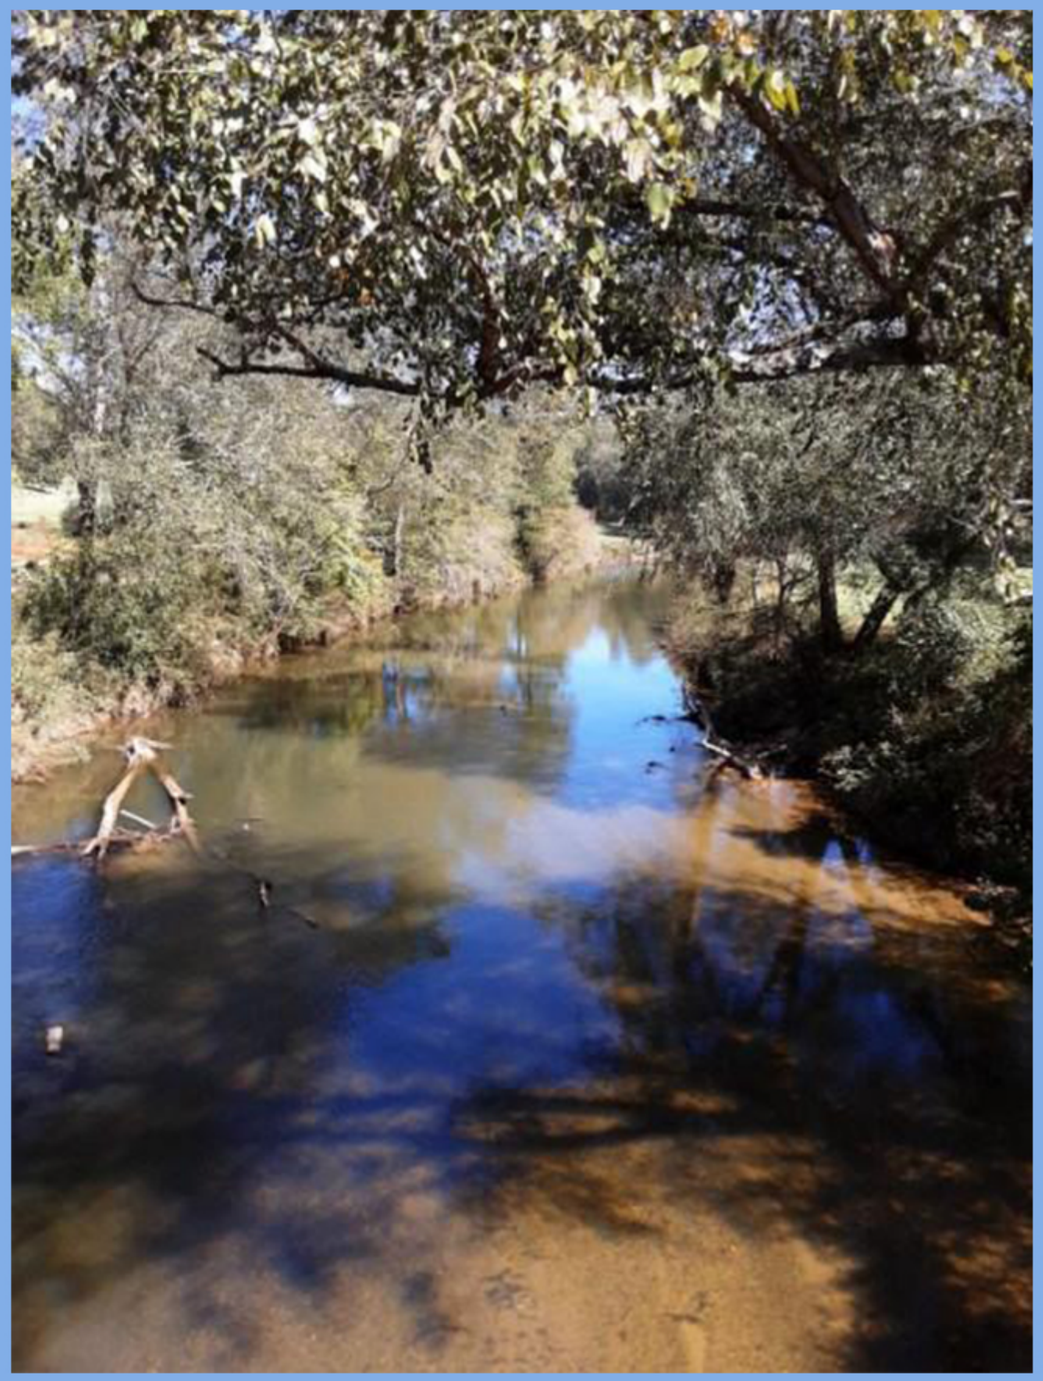
FRELIN

I decided to speak about nature

I chose this subject because I'm a nature lover. Because of nature, we are able to live, and because of her, we have oxygen.



Every living being on planet earth has life because of nature.

But with time, we as humans have not taken care of the environment and we contaminate the air, etc

We have to take more care of nature because thanks to her we have life and to be able to live in a good and healthy environment.
